Model high school senior Oliver Powers goes to a wine country kegger to make up with his girlfriend, Lola. On the way home, he ends up in a head-on collision only to find one person dead, his future without hope, and that he has destroyed the lives of many people. Intelligent and charismatic fair-weather friends Grape Juice and Kristen have the skill to both organize the party and then duck responsibility for the consequences, leaving their now ex-new best friend to his fate. Learning the ropes from the older students are Nameless and Avery, and freshman I.D. who holds steadfastly to idealism while parting with innocence.
